

CURRICULUM VITAE

Alessio Zaccone

A: Dati personali

Nazionalita': Italiana

Data di nascita: 7 September 1981

Luogo di nascita: Alessandria (AL)

B: Docenze accademiche ricoperte

- 2018 – **Professore Universitario di II fascia**, Dipartimento di Fisica “A. Pontremoli”, Universita' degli Studi di Milano, con Abilitazione ASN per Professore di I fascia.
- 2015 –2018 **University Lecturer** and Head of the Statistical Physics Group at the University of Cambridge.
- 2014 - 2015 **Professor (W2) of Theoretical Physics**, Physik-Department, Technical University Munich.
- 2011 - 2014 **Oppenheimer Research Fellow in Physics (independent group leader)**, Cavendish Laboratory, University of Cambridge, UK.
- 2010 - 2011 Swiss National Science Foundation Research Fellow at Cavendish Laboratory, University of Cambridge UK

C: Studi e qualificazioni

- 2006 - 2009 **PhD in Fisica Statistica** “On a coarse-graining principle in colloidal physics with application to fluid and arrested colloidal suspensions in shearing fields” sotto la supervisione del Prof. M. Morbidelli e del Prof. H.-J. Hermann, ETH Zurich. PhD viva voce sostenuto il 28 October 2009, insignito della ETH Medal for outstanding PhD thesis. Breve periodo come post-doc all' ETH fino al 30 September 2010.
- 2000 - 2005 MSc (Laurea) in Chemical Engineering, Politecnico di Torino (Italy). Voto finale: 110/110.

D: Riconoscimenti internazionali

- Journal of Physics: Materials (IoP) Emerging Leader nomination (listed as one of the emerging leaders worldwide in the field of materials physics)
- American Chemical Society I&ECR Class of 2017 Influential Researcher Award: nominato fra i 37 scienziati piu' influenti al mondo per impatto sulle scienze chimiche
- Italian Scientific Habilitation (Abilitazione Scientifica Nazionale) as Full Professor in the class of Theoretical Condensed Matter Physics (Fisica teorica della materia, 02B2)
- Anthony L. Lyster Fellowship in Physics, Queens' College, University of Cambridge
- Swiss National Foundation (SNF) Professorship Award 2014
- Rudolf Mössbauer Fellowship Award, Technical University Munich, 2014
- Oppenheimer Research Fellowship, University of Cambridge, 2011
- Swiss National Foundation (SNF) Fellowship for Postdoctoral Researchers, 2010
- Alexander von Humboldt Fellowship, 2010
- ETH Medal Award for outstanding PhD thesis, 2010.

E: Produttività scientifica

- **89 articles published** in leading peer-reviewed journals (including: **11 in Phys. Rev. Lett.**, **3 in PNAS**).
- ~ 30 invited seminars and talks in departmental and international conferences, full details on request.

- > 1000'000 EUR third-party funding secured since 2014 (details below).

F: Ruoli di insegnamento

- 2018 - oggi: titolare di Metodi Matematici della Fisica II: Geometria Differenziale & Teoria dei Gruppi, Laurea Magistrale in Fisica, Università' degli Studi di Milano.
- 2019 - oggi: titolare di Metodi Matematici della Fisica I (analisi complessa, analisi funzionale & teoria delle distribuzioni), Laurea Triennale in Fisica, Università' degli Studi di Milano.
- 2015 - 2018: titolare di Part IA Physics modules (1st year undergraduate courses in Physics) e Part II modules of Quantum Condensed Matter Physics and Statistical & Thermal Physics (3rd year undergraduates) presso Cavendish Laboratory and Queens' College, University of Cambridge.
- 2016 - 2018: titolare di PartIIA "Process Dynamics & Control" and PartIIA "Partial Differential Equations", at the University of Cambridge.
- 2014 - 2015: titolare del corso "Advanced Statistical Mechanics", Physics Department, Technical University Munich.

G: Finanziamenti esterni alla ricerca

- US Army Research Grant (**616'000 GBP** since 01/10/2016).
- Grant industriale Synthomer Inc. per un PhD student per 3 anni (**80'000 GBP**).
- Rudolf Mössbauer Grant at TU Munich, partly from Marie-Curie EU Excellence Program (**750'000 EUR**), from 2014 till 2016. Used to fund two PhD students (Rico Milkus and Johannes Krausser).
- Swiss National Foundation Professorship (endowed with **1'400'000 CHF**).
- Winton Programme for the Physics of Sustainability: **80'000 GBP** for 3 years supporting a PhD student under my supervision (Breannan O. Conchuir), 2011-2014.
- Ernest Oppenheimer Fund: **200'000 GBP** supporting myself for a 3-year Research Fellowship at the University of Cambridge, 2011-2014.
- Swiss National Foundation: **60'000 CHF** supporting myself for a 1-year post-doc at the University of Cambridge, 2010 - 2011.

H: Collaboratori internazionali

US Army Research Laboratory (Dr T. Sirk and Dr. J. Andzelm), Prof. D. Weitz (Harvard), Prof. J.-L. Tamarit (Barcelona), Prof. M. Ballauff (Berlin), Prof. K. Samwer (Goettingen), Prof. G. Wilde (Muenster), Prof. D. Frenkel (Cambridge), Prof. D. Bonn (Amsterdam), Prof. M. Bonn (MPI Mainz), Prof. J. Brujic (NYU), Prof. T. Knowles (Cambridge), Prof. S. U. Egelhaaf (Duesseldorf), Prof. P. Schall (Amsterdam).

I: Dottorandi

Dottorandi correnti:

- Thomas Gray, PhD student 2016 - until 2019
- Luca Banetta, PhD student starting Jan. 2017 - until 2020
- Bingyu Cui, PhD student 2017 - until 2020

Ex-dottorandi:

- Dr Rico Milkus, PhD student 2014-2017, ora impiegato nell'industria (Beissbarth, Munich)
- Dr Johannes Krausser, PhD student 2014-2017, ora post-doc in fisica presso University College London
- Dr Breannan O. Conchuir, PhD student 2011-2014, ora R&D group leader presso IBM.

L: Lingue parlate

Italian (nativo), English (quasi nativo), German (fluente), French (conoscenze di base), Spanish (conoscenze di base).

Publicazioni in riviste scientifiche internazionali soggette a peer-review.

10 articoli significativi sono contraddistinti con asterisco.

1. M. Baggioli and A. Zaccone.
Hydrodynamics of disordered marginally-stable matter.
Physical Review Research, accepted, in press.
2. B. Cui, G. Ruocco, A. Zaccone.
Theory of elastic constants of athermal amorphous solids with internal stresses.
Granular Matter 21, 69 (2019) - Special Issue In Memoriam T. Behringer.
3. L. Banetta and A. Zaccone.
Radial distribution function of Lennard-Jones fluids in shear flows from intermediate asymptotics.
Physical Review E 99, 052606 (2019).
4. M. Baggioli and A. Zaccone.
Universal origin of boson peak vibrational anomalies in ordered crystals and in amorphous materials.
Physical Review Letters 122, 145501 (2019).*
5. J. Yang, Y.J. Wang, E. Ma, A. Zaccone, L.H. Dai, M.Q. Jiang.
Structural parameter of orientational order to predict the boson vibrational anomaly in glasses.
Physical Review Letters 122, 015501 (2019).
6. M. Lu, L. Banetta, L.J. Young, E.J. Smith, G.B. Bates, A. Zaccone, G. S. Kaminski-Schierle, A. Tunnacliffe, C. F. Kaminski.
Live-cell super-resolution microscopy reveals a primary role for diffusion in polyglutamine-driven aggresome assembly.
Journal of Biological Chemistry 294, 257-268 (2018).
7. B. Cui, Z. Evenson, B. Fan, M. Li, W.-H. Wang, A. Zaccone.
Possible origin of beta relaxation in amorphous metal alloys from atomic-mass differences of the constituents.
Physical Review B 98, 144201 (2018).
8. C. Eccles, S. Roy, T. H. Gray and A. Zaccone.
Reply to 'Comment on "Temperature dependence of nuclear fission time in heavy-ion fusion-fission reactions"'.
Physical Review C 98, 029802 (2018).
9. V.V. Palyulin, C. Ness, R. Milkus, R.M. Elder, T.W. Sirk, A. Zaccone.
Parameter-free predictions of the viscoelastic response of glassy polymers from nonaffine lattice dynamics.
Soft Matter 14, 8475 (2018). Featured on the journal cover.*
10. B. Cui and A. Zaccone.
Generalized Langevin Equation and fluctuation-dissipation theorem for particle-bath systems in external oscillating fields.
Physical Review E 97, 060102(R) (2018).
11. J. Krausser, A. Lagogianni, K. Samwer, A. Zaccone.
Reply to 'Comment on "Disentangling interatomic repulsion and anharmonicity in the viscosity and fragility of glasses"'.
Physical Review B 98, 016202 (2018).
12. M. Dang, R. Zargar, D. Bonn, A. Zaccone, P. Schall.
Nonequilibrium free energy of colloidal glasses under shear.

Journal of Physics D: Applied Physics 51, 324002 (2018).

13. B. Cui, J. Gebbia, J.-L. Tamarit, A. Zaccone.
Disentangling alpha and beta relaxation in orientationally disordered crystals with theory and experiments.
Physical Review E 97, 053001 (2018).
14. G. M. Cicuta, J. Krausser, R. Milkus, A. Zaccone.
Unifying model for random matrix theory in arbitrary space dimensions.
Physical Review E 97, 032113 (2018).*
15. V. Vetri, F. Piccirilli, J. Krausser, G. Buscarino, U. Lapinska, B. Vestergaard, A. Zaccone, V. Fodera'.
Ethanol controls the self-assembly and mesoscopic properties of amyloid spherulites.
Journal of Physical Chemistry B 122, 3101 (2018).
16. A. Zaccone.
Harnessing entropy in single-molecule force spectroscopy with semiconducting polymers.
Chem 4, 191-193 (2018).
17. R. Milkus, C. Ness, V. Palyulin, J. Weber, A. Lapkin, A. Zaccone.
Interpretation of the vibrational spectra of glassy polymers using coarse-grained simulations.
Macromolecules, 51, 1559–1572 (2018).
18. R. Higler, J. Krausser, J. van der Gucht, A. Zaccone, J. Sprakel.
Linking slow dynamics and microscopic connectivity in dense suspensions of charged colloids.
Soft Matter, 14, 780 (2018).
19. L. Perez-Ocampo, A. Zaccone, M. Laurati.
A well defined glass state obtained by oscillatory shear.
Journal of Rheology 62, 197 (2018).
20. C. S. Eccles, S. Roy, T. H. Gray, A. Zaccone.
Temperature dependence of nuclear fission time in heavy-ion fusion-fission reactions.
Physical Review C 96, 054611 (2017).
21. A. Maestro and A. Zaccone.
Nonaffine deformation and tunable yielding of colloidal assemblies at the air-water interface.
Nanoscale 9, 18343 (2017).
22. C. Ness, V.V. Palyulin, R. Milkus, R. Elder, T. Sirk, A. Zaccone.
Nonmonotonic dependence of polymer glass mechanical response on chain bending stiffness.
Physical Review E (Rapid Communication) 96, 030501(R) (2017).
23. B Cui, J. Yang, J. Qiao, M. Jiang, L. Dai, Y.-J. Wang, and A. Zaccone.
Atomic theory of viscoelastic response and memory effects in metallic glass.
Physical Review B 96, 094203 (2017).
24. J. Krausser, R. Milkus, A. Zaccone.
Non-affine lattice dynamics of defective fcc crystals.
Soft Matter 13, 6079 (2017).
25. V. Hieronymus-Schmidt, H. Roesner, G. Wilde, A. Zaccone.
Shear banding in metallic glasses described by alignments of Eshelby quadrupoles.
Physical Review B 95, 134111 (2017).

26. M. Abkenar, T. H. Gray, A. Zaccone.
Dissociation rates from single-molecule pulling experiments under large thermal fluctuations or large applied force.
Physical Review E 95, 042413 (2017).
27. S.H. Varol, F. Meng, B. Hosseinkhani, C. Malm, D. Bonn, M. Bonn, A. Zaccone, S. H. Parekh.
Nanoparticle amount, and not size, determines chain alignment and nonlinear hardening in polymer nanocomposites.
Proceedings of the National Academy of Sciences of the USA 114, E3170–E3177 (2017).
28. C. Ness and A. Zaccone.
Effect of hydrodynamic interactions on the lifetime of colloidal bonds.
Industrial & Engineering Chemistry Research 56 (13), 3726–3732 (2017).
29. J. Krausser, A. Lagiogianni, K. Samwer, A. Zaccone.
Disentangling interatomic repulsion and anharmonicity in the viscosity and fragility of glasses.
Physical Review B 95, 104203 (2017).
30. J. Sprakel, A. Zaccone, F. Spaepen, P. Schall, D. A. Weitz.
Direct observation of entropic stabilization of bcc crystals near melting.
Physical Review Letters 118, 088003 (2017).
31. R. Milkus and A. Zaccone.
Atomic-scale origin of dynamic viscoelastic response and creep in disordered solids.
Physical Review E 95, 023001 (2017).
32. B. Cui, R. Milkus, and A. Zaccone.
Direct link between boson-peak modes and dielectric alpha-relaxation in glasses.
Physical Review E 95, 022603 (2017).
33. M. Laurati, P. Masshof, K. J. Mutch, S. U. Egelhaaf, and A. Zaccone.
Long-lived neighbors determine the rheological response of glasses.
Physical Review Letters 118, 018002 (2017). *
34. B. Cui, R. Milkus, A. Zaccone.
The relation between stretched-exponential relaxation and the vibrational density of states in glassy disordered systems.
Physics Letters A 381, 446 (2017).
35. W.Y. Chen, L. Young, M. Lu Meng, A. Zaccone, F. Ströhl, N. Yu, G. Kaminski Schierle, C. Kaminski.
Fluorescence self-quenching from reporter dyes informs on the structural properties of amyloid clusters formed in vitro and in cells.
Nano Letters 17, 143 (2017).
36. A. Saric, T. Michaels, A. Zaccone, T.P.J. Knowles, D. Frenkel.
Kinetics of spontaneous filament nucleation via oligomers: insights from theory and simulation.
Journal of Chemical Physics 145, 211926 (2016).
37. A. Zaccone, I. Terentjev, T. Herling, T.P.J. Knowles, A. Aleksandrova, E.M. Terentjev.
Kinetics of fragmentation and dissociation of two-strand protein filaments: coarse-grained simulations and experiments.
Journal of Chemical Physics 145, 105101 (2016).
38. A. Lappala, A. Zaccone and E.M. Terentjev.
Polymer glass transition occurs at the marginal rigidity point with $z^=4$.*

Theoretical elastic moduli for disordered packings of interconnected spheres.
Journal of Chemical Physics 127, 174512 (2007).
88. A. Zaccone, A. Gäbler, S. Maaß, D. Marchisio, and M. Kraume.
Drop breakage in liquid-liquid stirred dispersions - Modelling of single drop breakage.
Chemical Engineering Science 62, 6297-6307 (2007).
89. S. Maass, A. Gäbler, A. Zaccone, A. Paschedag, and M. Kraume.
Experimental investigations and modelling of breakage phenomena in stirred liquid/liquid systems.
Chemical Engineering Research & Design 85, 703 (2007).

Seminari su invito (una selezione)

Zaccone A. (2018). Generalized Langevin Equation modelling of viscoelastic and dielectric properties of glasses. **Invited talk** at the CECAM workshop on "Dynamic Coarse-Graining and Memory Effects in Soft Matter Systems", at Max-Planck Institute for Polymer Research, Mainz, Germany, 24-26/10/2018.

Zaccone A. (2018). Microscopic modelling of dielectric alpha and beta relaxation in glasses and orientationally disordered crystals based on Generalized Langevin Equations. **Invited talk** at the 10th Broadband Dielectric Spectroscopy Conference, Brussels, Belgium, 27-31/08/2018.

Zaccone A. (2017). The origin of the boson peak and its link with the dielectric and dynamic mechanical response of amorphous solids. **Invited talk** at the 8th International Discussion Meeting on Relaxation in Complex Systems, Wisla, Poland, 25-27/08/2017.

Zaccone A. (2017). Colloids in shear. **Invited plenary talk** at the SoftComp Annual meeting 2017, organized by the SoftComp (Soft Composites) EU research network. Venice, Italy, 29-31 May 2017.

Zaccone A. (2017). Understanding polymer glasses and their deformations at the monomer-level. **Invited talk** at the German Physical Society (DPG) Spring Meeting (Division of Chemical Physics). Dresden, Germany, 19-24/03/2017.

Zaccone A. (2017). Towards a nonequilibrium atomic-scale theory of the dynamical response of metallic glasses. **Invited talk** at the German Physical Society (DPG) Spring Meeting (Metal and Material Physics Division). Dresden, Germany, 19-24/03/2017.

Zaccone A. (2017). Molecular-level framework for the dynamic mechanical response and yielding of polymer glasses. Contributed talk at the 2017 Mach Conference, co-organized by Johns-Hopkins University and US Army Research Lab. Annapolis MD, USA, 7-9/04/2017.

Zaccone A. (2017). Bottom-up framework for the atomistic simulations of mechanical response of polymer glasses. **Invited talk** at the US Army Research Laboratory, Weapons & Materials Division, Aberdeen Proving Grounds, MD, USA, 04/01/2017.

Zaccone A. (2016). Nonaffine lattice dynamics of metallic glasses. **Invited talk** at the Glass Meeting Goettingen (GMG) workshop. University of Goettingen, Germany, 16/06/2016.

Zaccone A. (2015). Yielding of colloidal glasses. **Invited talk** at the Flowing Matter Across the Scales, COST conference. Rome, Italy, 25/03/2015.

Zaccone A. (2011). Shear-induced solidification of dilute colloidal suspensions: the ambiguous role of shear. **Keynote presentation** at the 25th European Colloid and Interface Society (ECIS) Conference. Berlin, Germany, 04-09/09/2011.

Zaccone A. (2010). Shear-driven solidification in colloidal suspensions: from Brownian liquids to granular suspensions. **Invited talk** at the Gordon Research Conference on Granular & Granular-Fluid Flow. Colby College, Waterville, USA, 24/06/2010.

Zaccone A. (2015). Inversion-symmetry breaking controls the boson peak of glasses and disordered crystals. **Invited talk** at the Institute of Physics, University of Amsterdam (UvA).

Zaccone A. (2015). Statistical mechanics of self-assembly of functional nanoparticles and protein systems. **Invited talk** at the National Institute of Standards and Technology, Center for Neutron Research, Gaithersburg MD, USA.

Zaccone A. (2015). Mechanical response of soft functional materials. Invited seminar at the Department of Physics, Georgetown University, Washington DC, USA, 06/2015.

Zaccone A. (2014). Microscopic origin of nonlinear nonaffine deformations in metallic glasses. **Invited talk** at Physikalisches Institut, University of Goettingen.

Zaccone A. (2014). Molecular self-assembly and gelation. **Invited talk** at Institute of Applied Physics, University of Tuebingen, Germany.

Zaccone A. (2013). Molecular-level theory of soft and biological matter. **Invited talk**, Department of Physics, Durham University, UK 29/05/2013.

Zaccone A. (2013). Mechanics of disordered matter at the molecular level and the glass transition. **Invited talk** within the Theoretical Physics Seminar series, Department of Physics, University of Bristol, UK 15/05/2013.

Zaccone A. (2013). The low-T side of the glass transition: melting of amorphous solids and polymers. **Invited talk** at the School of Physics and Astronomy, University of Leeds, UK 19/02/2013.

Zaccone A. (2012). Statistical mechanics of elasticity in disordered solids. **Invited talk** within the Series of Seminars in Statistical Mechanics, Laboratoire de Physique Theorique de l'Ecole Normale Supérieure, Paris, France, 26/01/2012.

Zaccone A. (2012). Mechanical properties of disordered matter. **Invited talk** within the Lorentz Seminar, Lorentz Institute for Theoretical Physics, University of Leiden, The Netherlands, 7/02/2012.

Zaccone A. (2009). Activated-rate processes in shear and application to shear-induced phenomena in soft matter. **Invited talk** at the Helmholtz Institute for Materials and Energy (formerly Hahn-Meitner Institute), Berlin, Germany, 16/11/2009.
